High Level Goals:
    Users can…
- join a class created by their professor
- complete and edit their profile browse projects/teams already posted
- view team members
- add a project with specifications
- search for compatible teammates
- request to join another user's team
- approve or deny another user's request to join their own team

    Professors can…
- create a class and invite their students to join
- post projects on behalf of sponsors
- view statistics about the class (i.e. number of students without a team, number of teams with >5 or <3 students, etc.)

User stories for release:
- **Sprint 1:**
  - As a user I want a simple UI for easy readability
  - As a user I want to login so that I can access my class
  - As a user, I want the ability to create a project so that other people in the class can view my project
  - As a user, I want a profile so I can edit my information and it is available to other users
  - As a user I want to be able to view all current projects
  - As a user I want to be able to view all member profiles in my class
  - As a user I want to be able to be in multiple classes so that I can use GroupThink with more than one group Project

- **Sprint 2:**
  - As a project owner, I would like to be notified if someone requests to join my project
  - As a project owner, I would like to see matching students so I can assemble a team

- As a user I would like to be able to distinguish between open and closed projects
- As a user, I would like to view other users to see their information
- As a project owner I would like to edit my project

- **Sprint 3:**
  - As a professor (admin) I would like a class page that is private to my students, so that only my current students can access projects/profiles
  - As a professor (admin) I would like to view statistics on class participation to facilitate project and group management
  - As a project owner, I want the ability to approve/deny someone's request to be in my project
  - As a professor (admin) I would like to be able to post sponsored projects

Product Backlog:
- The ability for users to chat with each other via the website
- Additional features for the admin(professor)
- Custom group roles for users (Scrum Master, Project Owner…)
- Integration with github for version control
- Integration with other social media
- A partner app for mobile for live updates about a project
- Eddy "Clippy", a buddy that helps you find projects
